Biotinylated Human Kallikrein 7/KLK7 Protein (pro form)

Catalog # KLK7-HB002 Form: Lyophilized

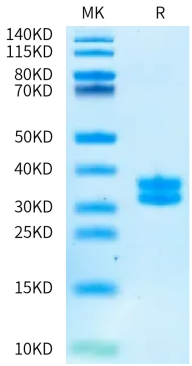

Product Details

Product description	Recombinant Biotinylated Human Kallikrein 7/KLK7 Protein (pro form) is expressed in HEK293 cells with a His tag and Avi tag at the C-terminus. The protein needs to be activated by Thermolysin for an activated form. It contains amino acid residues Glu23-Arg253 (UniProt accession: P49862-1).
Molecular aliases	Kallikrein-7; hK7; Serine protease 6; hSCCE; KLK7; PRSS6; SCCE
Expression system	HEK293
Molecular weight	The protein has a predicted MW of 28.11 kDa. Due to glycosylation, the protein migrates to 30-40 kDa based on Bis-Tris PAGE result.
Purity	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC
Endotoxin	Less than 1 EU per μg by the LAL method.
Formulation	Lyophilized from 0.22 μm filtered solution in 20mM HEPES, 150mM NaCl (pH 7.5). Normally 8% trehalose is added as protectant before lyophilization.
State	Lyophilized
Storage	-20 to -80°C for 12 months as supplied from date of receipt. -80°C for 3 months after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.
Reconstitution	Dissolve the lyophilized protein in distilled water. Please refer to the Certificate of Analysis for detailed instructions.
Activity validation	Activity verified

Protein Integrity

Bis-Tris PAGE

Representative product-page data

Reported result

Biotinylated Human Kallikrein 7 on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.
