Human ROR2/NTRKR2 Protein

Catalog # ROR2-HF001 Form: Lyophilized

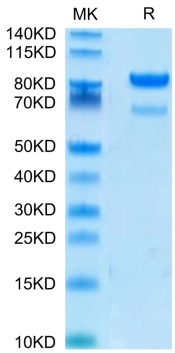

Product Details

Product description	Recombinant Human ROR2/NTRKR2 Protein is expressed in HEK293 cells with an hFc (IgG1) tag at the C-terminus. It contains amino acid residues Glu34-Gly403 (accession: A1L4F5).
Molecular aliases	BDB; BDB1; NTRKR2; ROR2
Expression system	HEK293
Molecular weight	The protein has a predicted MW of 68 kDa. Due to glycosylation, the protein migrates to 80-110 kDa based on Bis-Tris PAGE result.
Purity	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC
Endotoxin	Less than 1 EU per μg by the LAL method.
Formulation	Lyophilized from 0.22μm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
State	Lyophilized
Storage	-20 to -80°C for 24 months as supplied from date of receipt. -80°C for 3 months after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.
Reconstitution	Dissolve the lyophilized protein in distilled water. Please refer to the Certificate of Analysis for detailed instructions.
Activity validation	Activity verified

Protein Integrity

Bis-Tris PAGE

Representative product-page data

Reported result

Human ROR2 on Bis-Tris PAGE under reduced conditions. The purity is greater than 95%.
